

Secure and seamless mobile printing to multiple printer brands.

Mopria Print Service for business mobile printing.

More than 120 Million Mopria Certified Printers

Mopria Print Service offers secure and seamless printing from Android devices to more than 120 million Mopria certified printers. With this app, employees can connect and print to any Mopria certified printer without having to install printer brand-specific apps.

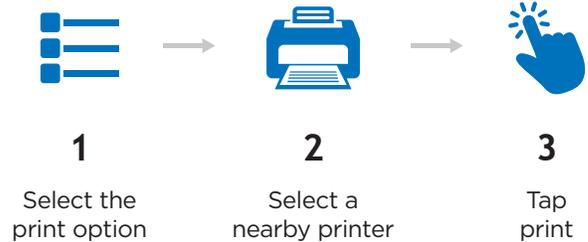

Android devices with the Mopria Print Service app can wirelessly locate and connect with nearby compatible printers on a wireless network or using Wi-Fi Direct. Employees just press print to send business documents, reports, spreadsheets, presentations, web pages, emails, and other content to a nearby printer.

For admins wanting to include printing for their EMM users, Mopria Print Service enables admin-level control around what is printed and how it is printed. Using Mopria Print Service, admins can implement print policies that save money, such as restricting printing by only allowing two-sided or monochrome (black and white) printing. For security purposes, administrators can require users to enter a PIN before printing or use an SSL connection when printing. Admins can even track the printing behaviors of individual users via User and Account IDs.

How to use the Mopria Print Service

Open the app you want to print from and look for a print option, button, or icon. This print function is often found under the share menu.

Free & Easy-to-Use

The Mopria Print Service can be downloaded for free from Google Play and offers simple and seamless printing from current Android devices to millions of certified printers worldwide.

Security

TLS protocol can enforce secure print data transfer between Mopria Print Service and printers, PIN printing enhances user's privacy.

Easy Customization

Employees can customize color, number of copies, duplex, paper size, page range, media type and orientation all without having to install printer-brand specific apps.

Workplace Features

Designed specifically for enterprise users, the Mopria Print Service includes workplace features like punching, folding, stapling, user authentication and accounting features for print cost calculation.

Easy Access

Mopria gives employees the ability to wirelessly locate and connect with nearby compatible printers in the workplace.

Printing Administration

Admins can enforce print policies to ensure printing is always available but remains cost effective and secure as possible.

Expanding Network of Printers

Since the world's leading printer manufacturers are all part of the Mopria Alliance, the long list of certified printers continues to grow.

About Mopria Alliance

The Mopria Alliance is a non-profit organization formed and supported by leading global technology companies with the goal of providing universal standards for printing and scanning. The Alliance developed the Mopria mark so users only need to look for this designation to know that their devices are ready to print from and scan to any modern device.

Founded in 2013, by Canon, HP, Samsung, and Xerox, the Mopria Alliance is represented by leading companies in the worldwide printer and scanner business.
